

Car Enthusiast's Lamp

This is a lamp for the car enthusiast. With a brake rotor base, this product displays two piston and rod assemblies up front. The stalk of the lamp is bolted on utilizing 4 black security lug bolts. The stalk itself features a carbon fiber tube with frosted acrylic sitting just below the black cold air intake filter with chrome accents sitting at the top. The bulb is a 100 Watt equivalent LED bulb to brighten the darkest rooms. The cord features a flip switch right near the plug. A rubber pad is added to the bottom of the rotor for protection against scratching.
